England failure steps off plane and insults fans by showing off blinging house

EXCLUSIVE by RICHARD MORRIARTY
FLOP Raheem Sterling faced fury last night for flaunting a show of wealth in a video posted hours after flying home from England's Euro 2016 shame.
The Manchester City winger, 25, highlighted a crystal-encrusted bathroom sink during a tour of a mansion.

Owner

A rough list of functions and utilities I'd like to add to the package. Recommendations welcomed!

🚧 = under construction

💡 = still just a pipedream

Visualisations

💡 Post-match odds based on simulating shots

🚧 Voronoi diagrams / Delaunay triangulation / convex hull

🚧 Wrapper functions to [animate](#) metrics frame by frame

💡 Defensive coverage plots

Advanced analytics

🚧 Wrapper functions for common metrics (xG, xA, forward progressions, PossAdjT&A, etc...)

💡 [Event sequence plots](#) and [possession sequence metrics](#) (possession spell and final product, i.e. does it end in final third, end in shot, end in goal)

💡 [Directness](#), [synchronisation of movement direction](#), space utilisation)

🚧 Space control / dominance (e.g. ratio of Voronoi areas / convex hull areas)

💡 Goalscoring threat (xG in each frame based on view to goal based on distance / angle of ball from
